

INFORMATION SECURITY POLICY

Simulation Software Limited, industry specialists in the development and supply of high performance software solutions for pipelines in water, oil, power and gas industries is committed to supplying products and services in a data secure environment, protecting the confidentiality, integrity and availability of company and client assets at all time.

The company will fulfil its commitment to information security by:

- Protecting data from unauthorised modification, loss, accidental or deliberate disclosure
- Ensuring compliance with applicable data protection legislation
- Continually improving products, services and processes and ways of doing business relating to confidentiality, integrity and availability of all data to customers, 3rd parties and other interested parties
- Provide adequate resources for the achievement of the policy objectives

All members of the company are required to work within the framework of this policy, processes and procedures and are responsible for carrying out business related activities, services and processes in accordance with the requirements of ISO/IEC 27001:2013 (E). ISMS objectives are selected through business risk assessments and progress reviewed through the management review process.

This policy is made available to the organisation via internal office display, internal circulation and to other interested parties via the company website.

This information security policy is approved by the undersigned representative of top management, and is the authoritative document relating to the security of information and information management within the Company.

Jonathan Theakston

Operations Director
